

SmartNitrogen

Controlled Release Fertilizer

A *smarter* source of nitrogen.

A *smarter* way to grow.

Notes from the Field

April 2008

ESN on Tobacco Increases Yields and Crop Quality

Billy Parm, tobacco grower from Sedalia, KY is sold on using ESN. ***“Because of the response we got using ESN, we saved work, time, and the cost of a second application. We have also seen a decrease in root scull.”*** His fertilizer program for 2008 will be 1000 lbs 6-12-18 Super Rainbow and **700 lbs ESN** per acre.

“Due to the tobacco buy out we have larger growers who are looking for better technologies”, says David Guthrie, manager at Sedalia, KY, CPS. ***“ESN is the ticket for saving time and increasing yields.”***

Mark Thompson, who grows 50 acres of dark tobacco annually near Fancy Farm, KY prefers ESN as well. ***“After using it last year and yielding 4000 lbs per acre, I am planning on expanding with it this year. That’s the best yield I ever had.”*** His program for 2008 is 300 lbs Potash, 300 lbs DAP, **500 lbs ESN**, 300 lbs Pell Lime, 300 lbs 5-20-20 Super Rainbow. All applied at plant set.
